

Designed with **Comfort** top of mind

Monumental improvements in speech clarity and noise reduction are complimented by the extremely lightweight ergonomic design of the VMX 100. Not only does it fit the contour of your ear, superior personalized wearing comfort is achieved thanks to a unique 3D ball joint. This enables adjustment of the microphone boom to personal preferences.

And the sleek, slim VMX 100 fits neatly in your pocket. Discreet, durable and sophisticated, the VMX 100 is simple to use and compatible with all Bluetooth® mobile telephones. It also comes with a compact carrying case for convenient storage.

The Bluetooth word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Sennheiser Communications is under license.

The blueprint for **VMX 100** excellence

Combining the high-end sound quality known from Sennheiser music recording and reproduction systems with the leading sound perception technologies originally developed for digital hearing instruments by William Demant, Sennheiser Communications has created and is proud to present a truly revolutionary wireless mobile headset – the VMX 100.

Feature overview

- VoiceMax™ Dual Microphone technology
- 3D ball joint for individual wearing comfort
- Automatic power off/on when closed/opened

Premium mobile communication

The first wireless headset
with VoiceMax™ dual
microphone technology

It's the Conversation that matters

When talking on your mobile telephone with business associates, partners, friends or loved ones at home, the most important sounds are the sound of your voice and that of the person with whom you are speaking. Everything else is noise. Irritating noise that can easily disrupt the flow of your conversation making it difficult for both of you to be heard and understood.

This is especially annoying if you lead an active life and depend on your mobile telephone to keep in touch. Whether you're out in traffic, racing from meeting to meeting or carting across the fairways of your local golf course, background noise should not distract from what you say.

With the VMX 100, noise is no problem. It does everything you want a Bluetooth headset to do, plus ensures that your voice will be clearly understood – no matter how noisy your surroundings. Background noise stays where it belongs. In the background. You get crystal clear and hands free conversation.

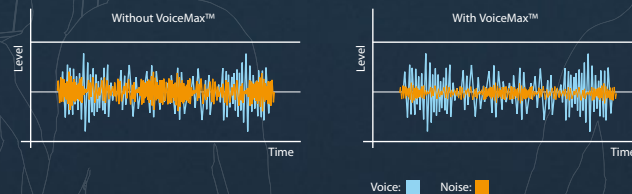

VoiceMax™ dual microphone technology

VoiceMax™ dual microphone technology is the key to VMX 100 noise free mobile telephone conversation.

The genius of VoiceMax™ is a unique directional system using two microphones and advanced digital processing to distinguish speech from other noises. The two microphones work in synergy; one to emphasize your voice, the other to remove noise.

What you say is transmitted clearly to the listener, while distracting sounds such as wind, noise from traffic or machinery, or the murmur of a crowd are effectively eliminated.

The VMX 100 is also easy on your ear. VoiceMax™ works in tandem with an advanced noise management system. Incoming signals are analyzed to isolate speech from noise. Only speech comes through loud and clear.

The advanced features of the VMX 100 make it easier for you to be heard, it also intelligently filters background noises from incoming calls, enabling you to better hear what is being said. Everybody benefits. That's reason to smile.
